

# Exceptional Coverage Options—All Under One Roof

As one of the most reputable metal building manufacturers in the industry, we understand that the extensiveness of your warranty needs can vary significantly depending on the size and scope of the project. For this reason, we have developed two primary warranty programs, each of which offers a distinctive range of options and benefits.

## Standard I, II & III Warranty Programs

- Overview** Competitive standard warranties that serve to cover the weathertightness of the building, provided it has been installed in accordance with our erection drawings.
- Responsibility** Jointly issued between our company and the roofing contractor/erector. This means that the erector has joint responsibilities with regards to repairs.
- Ownership** Erector's name on warranty.
- Installation Requirements** Certified Installation only required for Standard III.
- Inspection Requirements** Inspection at additional cost – not required as part of program.
- Primary Benefits** Provides cost-effective weathertightness warranty coverage.

## Single-Source™ Warranty I, II & III Programs

- Overview** Premier warranties that include geometry and detail review, along with regular inspections to ensure that the approved details are being followed. Inspection reports are provided to the roofing contractor and architect to ensure compliance with warranty requirements.
- Responsibility** We maintain sole responsibility for the warranty from day one – it is our job to manage repairs.
- Ownership** Our name only on warranty.
- Installation Requirements** Certified Installer required for all three warranties.
- Inspection Requirements** Inspections required at key intervals during roof installation required – roof must be in compliance before warranty is issued.
- Primary Benefits** Superior industry leading program to ensure accurate roof installation and provide long-term protection.
